

# Do you have what it takes to save the earth?

## Environmental Care Project

We're actively seeking young minds  
to join us in our quest for  
environmental care and protection.

At Sembawang Shipyard, we believe that this project will help to instill a sense of personal and group awareness in the students, motivating them to learn how to reason, think globally and act locally to protect the environment. We aim to reward innovative thinking and the development of new ideas, processes and equipment that can contribute towards the betterment of our environment.

**Join the competition and tell us your ideas on saving the earth.**
