

Green Wave Environmental Care Project for Schools Award Ceremony 2006

"More youths are taking part in the Green Wave Environmental Care Project and I find this heartening. In engaging our young, we nurture and revitalise a sense of environmental responsibility in future generations.

I applaud Sembawang Shipyard, Shell and BP for helping to enhance environmental awareness and ownership in the community."

Dr. Yaacob Ibrahim, Minister for the Environment and Water Resources

groups like SembCorp Marine, Senoko Power, other Statutory Boards like HDB, community centres' representatives, tertiary institutions', and schools' principals, heads and students.

We are grateful for the continued strong support from our alliance partners, Shell International Trading and Shipping Company (STASCo) and BP Shipping whose representatives specially flown in to attend the award

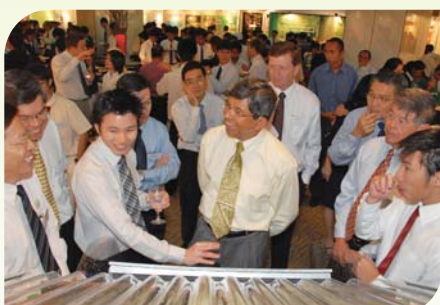

The award ceremony for the Green Wave Environmental Care competition 2006 was successfully held at the Meritus Mandarin Hotel, Mandarin Court on 30 January 2007. This event was officially graced by Dr. Yaacob Ibrahim, Minister for the Environment and Water Resources and was attended by more than 340 guests.

Launch of the Green Wave Environment Competition 2007 by Dr. Yaacob Ibrahim and Mr. P. K. Ong

Memorable group picture for the Top prize winning team from Ngee Ann Polytechnic. From left, Ms. Wong Lee Lin, Executive Director & Chairman of Green Wave Committee(SSPL), Mdm. Choi, Lecturer, representatives from STASCO; Mr. David Lee, Superintendent, Mr. Steve Burns, Deputy Fleet Manager, Mr. Andrew Laird, Manager Procurement & Corporate Contracts, Mr. Chris Baldwin, Chartering Manager, SIETCO, Mr. P K Ong, MD (SSPL) and Mr. Koh Wee Hiong, Director of Engineering, Ngee Ann Polytechnic. The students were Mr. Goo Chee Tiong and Mr. Nguyen Son Tung.

participants from Primary, Secondary, Junior Colleges / ITE and Tertiary Levels. This is indeed a significant increase from 117 projects and 627 participants when the competition was first launched in 2003.

Mr. P K Ong, Managing Director of Sembawang Shipyard in his welcome speech said “We are pleased that our Green Wave is now a key platform for our students to share their innovative

green ideas on sustainable environmental care and protection. The main objective of the Green Wave Environmental Care Project for schools when we launched in 2003 is to enthuse and set our students on a life-long educational and discovery journey in environmental awareness and involvement, which we hope will fire their passion and imagination to want to make a difference in environmental care and protection. When one student takes an interest, excites his peers to share his interest and together with their teachers’ guidance is keen to experiment on a project through creative and innovative thinking, then Green Wave has achieved its main objective”.

During the award ceremony, Dr. Yaacob Ibrahim presented a total of 51 awards to the winning teams. For the first time in the competition since 2003, the Top Prize for the Tertiary competition has been won by a team from Ngee Ann Polytechnic for their innovative project entitled, ‘Water Management System’. This award comes with a S\$10,000 cash prize and a one-month development attachment with a Shell associate company, North West Shelf Shipping Service Company in Australia. The Top Prize is jointly sponsored by Shell International Trading & Shipping Company Limited and Sembawang Shipyard. Besides presenting the awards, the Minister launched the Green Wave Environmental Competition for 2007.

All guests were also invited to a buffet reception and to view the winning exhibits after the award ceremony. All the winning team members proudly explained their innovative projects and prototypes to the Minister and guests, with many also taking memorable group pictures with the Minister. A special 2 hour tour of Sembawang Shipyard was also organized for the student participants on 31 January 2007 to give them an opportunity to learn about our business and the thriving marine industry. ⚓

The Green Wave Environment Competition 2007 is now open for registration and all students and schools are invited to participate and share their ideas on environmental care and protection. For more information and details, please refer to www.sembship.com/greenwave

All the happy faces of winning teams!
