

Royal Odyssey

The Royal Odyssey at 28,018 grt is one of the large cruise liners among the international vacation fleet.

In partnership with Lloyd Werft Bremerhaven, the refit consisted of extensive repairs in the machinery area, in the supply and discharge systems and the renewal of all of her passenger cabins and the rearrangement of nearly all public rooms of the ship.

The refit of the Royal Odyssey is testimony of Sembawang's leadership, expertise and capability in meeting the high standards demanded in the repair and refit of cruise vessels.
